EDUCATION

Florida State University

Master of Science in Computer Science

Tallahassee , FL

Aug 2023 – May 2025

Jawaharlal Nehru Technological University, Hyderabad

Bachelor of Technology in Computer Science & Engineering

Hyderabad, India

Aug. 2017 – Jul 2021

EXPERIENCE

Data Intern

June 2024 – Dec 2024

Florida state University ITS

Tallahassee , FL

- Managed and maintained over 10,000 records with 99% accuracy, optimizing data workflows to reduce entry time by 15% and enhance operational efficiency.
- Developed and delivered 5+ monthly data analysis reports and executive dashboards with advanced visualizations, driving data-informed strategic decisions.
- ensured 100% data integrity through weekly quality audits, leveraging meticulous attention to detail and process improvement methodologies

Data Engineer

Sep. 2018 – Present

Infosys

Hyderabad, India

- Spearheaded the deployment of 20+ AWS CloudFormation scripts, improving infrastructure scalability by 30% and supporting seamless cloud operations.
- Consolidated over 1,000 data records into Amazon S3, streamlining data accessibility and enhancing process efficiency.
- Led the migration of legacy FTP pipelines to secure SFTP, boosting data security for large-scale data transfers.
- Engineered AWS Lambda functions to process over 1 million database queries monthly, achieving a 25% reduction in processing time.
- Designed and implemented a monitoring pipeline to detect and resolve system failures, reducing downtime by 40%.
- Deployed all solutions using Jenkins CI/CD pipelines to ensure smooth and automated integration and delivery.

PROJECTS

Efficient Real-Time Analysis of Reddit Trends

Sep 2024 – Dec 2024

- Utilized the Reddit API to fetch real-time subreddit data and keyword activity for analysis.
- Implemented GitHub OAuth to get data from user's repositories
- Implemented the Count-Min Sketch algorithm to track 1M+ trends with less than 1 MB of memory.
- Identified trending subreddits and keywords efficiently, balancing speed and accuracy.
- Achieved approximate counts with controlled error margins, enabling large-scale data analysis.

Facial Recognition System Mobile Application

Sep 2023 – Dec 2023

- eveloped a cross-platform mobile application using React Native, achieving 85% accuracy in facial recognition
- Processed 100+ facial images for daily class attendance, successfully reducing manual entry time by 50%.

Twitter Sentiment analysis

Sep 2023 – Dec 2023

- uilt a sentiment analysis tool to classify 5,000+ tweets into Positive, Negative, and Neutral categories, attaining 80% accuracy on a wide range of topics.

TECHNICAL SKILLS

Languages: Java, Python, SQL, JavaScript, C++, C, Prolog, HTML/CSS,

Frameworks: React Native, AWS Lambda, Tkinter, RESTful APIs, WordCloud, Matplotlib, Flask.

Developer Tools: Jenkins CI/CD, GitHub Actions, AWS IAM, Secrets Manager, Step Functions.

Libraries: NLTK, Pympler, Collections, PRAW, WordCloud, Matplotlib.
