EDUCATION

Florida State University

Master of Science in Computer Science

Tallahassee, FL

Aug 2023 – May 2025

Jawaharlal Nehru Technological University, Hyderabad

Bachelor of Technology in Computer Science & Engineering

Hyderabad, India

Aug. 2017 – Jul 2021

TECHNICAL SKILLS

Programming Languages: Python, R, SQL, Java, PHP, TypeScript, JavaScript, Go, C++

Frameworks & tools: Spring boot, React, Node.js, AWS (Lambda, SQS, CloudFormation, Glue), OpenSearch (ElasticSearch)

Cloud: AWS (S3, RDS, CloudWatch, Step Functions), PostgreSQL, MySQL, NoSQL, Semantic Data Stores (SPARQL)

Databases: PostgreSQL, MySQL, NoSQL

Developer Tools: Microservices Architecture, Agile Methodologies, Secure Coding Practices

Visualization: Tableau, Power BI

EXPERIENCE

Data Intern

June 2024 – Dec 2024

Florida State University ITS

Tallahassee, FL

- Collaborated with IT and academic stakeholders to gather system requirements and analyze operational data, identifying opportunities for process improvement.
- Prepared detailed reports and presentations that supported strategic decision-making and communicated technical findings to non-technical audiences.
- Developed testing strategies, scenarios, and scripts to validate data workflows and security standards, ensuring high data integrity.
- Implemented and maintained data workflows (processing over 10,000 records with 99% accuracy) and automated routine audits, resulting in a 15% improvement in operational efficiency.
- Coordinated with cross-functional teams to streamline process flows and refine system monitoring through scheduled cron jobs.

Data Engineer

July 2021 – Aug 2023

Infosys - Florida Power & Light

Hyderabad, India

- Worked closely with business process owners, technical teams, and external partners to analyze requirements, identify system gaps, and design effective solutions.
- Documented business process flows and technical specifications, ensuring clear communication among diverse stakeholders.
- Designed and developed a data pipeline using Java and Spring Boot, implementing data sorting and routing mechanisms that directed data to analytics platforms while archiving unused data in AWS S3, reducing overhead by 30%.
- Engineered AWS Lambda functions to process over 1M queries monthly, reducing query time by 25%, and created monitoring pipelines that minimized downtime by 40%.
- Implemented DynamoDB for scalable NoSQL storage, managed data archival processes, and ensured long-term storage efficiency and accessibility.
- Led initiatives to migrate FTP pipelines to secure SFTP and implement scalable data archival strategies.

PROJECTS

Efficient Real-Time Analysis of Reddit Trends

Sep 2024 – Dec 2024

- Designed a real-time data pipeline using AWS Glue to process API data and generate actionable insights.
- Applied algorithmic techniques (Count-Min Sketch) for efficient keyword tracking and developed dashboards for enhanced trend analysis.
- Collaborated with stakeholders to define requirements and validate system performance through targeted testing.

E-Commerce Analytics Dashboard

Sep 2023 – Dec 2023

- Developed a full-stack dashboard (Java backend, React frontend) for analyzing customer purchase trends.
- Integrated PostgreSQL with optimized queries, reducing processing time by 30%, and automated deployment pipelines with Jenkins.
- Gathered business requirements and translated them into technical specifications and reporting metrics.

Real-Time Notifications for Anomaly Detection

Sep 2023 – Dec 2023

- Created a real-time alerting system for workforce anomalies using AWS SNS.
- Developed an interactive user interface with ReactJS and TypeScript, improving issue resolution time by 30%.
- Collaborated with stakeholders to define system requirements and troubleshoot technical issues.
