EDUCATION

Florida State University

Master of Science in Computer Science

Tallahassee, FL

Aug 2023 – May 2025

- **Relevant Coursework:** Advanced Algorithms, Advanced Operating Systems, Machine Learning, Advanced Data Science, Analytic Methods

Jawaharlal Nehru Technological University

Bachelor of Technology in Computer Science & Engineering

Hyderabad, India

Aug 2017 – Jul 2021

TECHNICAL SKILLS

Programming Languages: Python, Java, SQL, JavaScript

Frameworks & Tools: Spring Boot, AWS Glue, AWS Lambda, AWS Step Functions, **Airflow**, OpenSearch (ElasticSearch), Apache Kafka, **pySpark**

Cloud Services: AWS (S3, RDS, DynamoDB, CloudWatch, EC2), PostgreSQL, MySQL, NoSQL

Developer Tools: Microservices Architecture, Docker, Kubernetes, **Linux**, Git, Jenkins, Agile Methodologies

Visualization: Tableau, Power BI

EXPERIENCE

Florida State University ITS

Data Intern

Tallahassee, FL

May 2024 – Dec 2024

- Designed and implemented robust automated data processing pipelines utilizing **Python, SQL, and AWS Cloud Services (Lambda, S3, DynamoDB)**, effectively handling huge datasets with an accuracy exceeding **99%**.
- Optimized workflow integrations with the university's **AIM system** via efficient API connections and SQL database enhancements, leveraging industry best practices including **star schema** principles to streamline data warehousing, significantly reducing manual processing tasks and improving operational efficiency by **20%**.
- Created and executed comprehensive data validation scripts, establishing automated and scheduled integrity checks using **AWS CloudWatch**, maintaining strict adherence to security protocols and ensuring consistent high-quality data governance.

Florida Power & Light

Data Engineer

Hyderabad, India

July 2021 – Aug 2023

- Designed and developed a data pipeline using **Java** and **Spring Boot**, implementing data sorting and routing mechanisms to direct data to analytics platforms and archive unused data in **AWS S3**, reducing overhead by **30%**.
- Engineered **AWS Lambda** functions to process over **1M queries monthly**, reducing query time by **25%**, and built monitoring pipelines that reduced system downtime by **40%**.
- Implemented scalable **NoSQL** storage solutions using **DynamoDB**, and migrated legacy **FTP** pipelines to secure **SFTP** protocols.
- Deployed solutions using **AWS CloudFormation** and **Jenkins CI/CD** to automate provisioning and streamline delivery in containerized environments.

PROJECTS

Efficient Real-Time Analysis of Reddit Trends

- Designed a real-time data pipeline using **AWS Glue** to process API data and generate actionable insights.
- Implemented efficient keyword tracking using the **Count-Min Sketch algorithm**, visualizing insights through interactive dashboards.
- Validated pipeline performance and data accuracy through automated testing and data-quality checks.

E-Commerce Analytics Dashboard

- Built a full-stack analytics dashboard with **Java (Spring Boot)** and **React** to visualize and analyze customer purchasing trends.
- Optimized database queries with **PostgreSQL**, reducing processing time by **30%**, and implemented automated CI/CD pipelines using **Jenkins**.
- Translated business requirements into detailed technical specifications and actionable analytics metrics.

Real-Time Notifications for Anomaly Detection

- Developed a real-time anomaly alerting system leveraging **AWS SNS** for immediate notifications.
- Designed a responsive UI using **ReactJS** and **TypeScript**, reducing issue resolution time by **30%**.
- Incorporated stakeholder feedback to refine system requirements and efficiently resolve technical issues.
